

DEVEX 2015 - Young Professionals Site Visit to Schlumberger Logging Tools

Kindly Supported by SCHLUMBERGER

Date: Friday 22nd May 2015

Time: 09:45 – 15:30

Leader: James Patton, Schlumberger

HSE Lead: TBC

Site visit

Details:

The aim of the Young Professionals Site Visit to Schlumberger logging tools is to connect Geoscientists who analyse wireline, geochemical, borehole imaging and pressure data with the tools that are placed down the wellbore to extract this data.

The site visit is particularly directed towards Young Professionals who are unfamiliar with wireline tools and would appreciate seeing the context of how measurements are obtained and how a wireline tool string is configured.

The site visit will begin with a series of morning lectures providing a background on the tools. A buffet lunch at the Schlumberger facility will be included, followed by a tour of the wireline shop visit in the afternoon to see the tools up close and demonstrations.

The tour of the wireline shop will be as follows:

- 1) Basic Petrophysics, Triple combo service (density, neutron, resistivity)
- 2) Advanced Petrophysics, Reservoir quality and Facies classification (spectral GR, NMR, Geochemical logging)
- 3) Geology & geophysics (Imaging and array sonic services)
- 4) Reservoir Engineering (Pressures & Sampling, MDT)

Dress code: Comfortable and warm clothing is required. Safety glasses, gloves, hats, hard boot covers and overcoats will be available for all participants on site. Anyone not dressed appropriately will not be allowed to attend due to health and safety.

Materials: Any required hand-outs/materials will be distributed by Schlumberger during the visit.

Lunch: A complimentary buffet lunch will be provided at the Schlumberger site.

Cost: £20 plus VAT (lunch included, transport is not included)

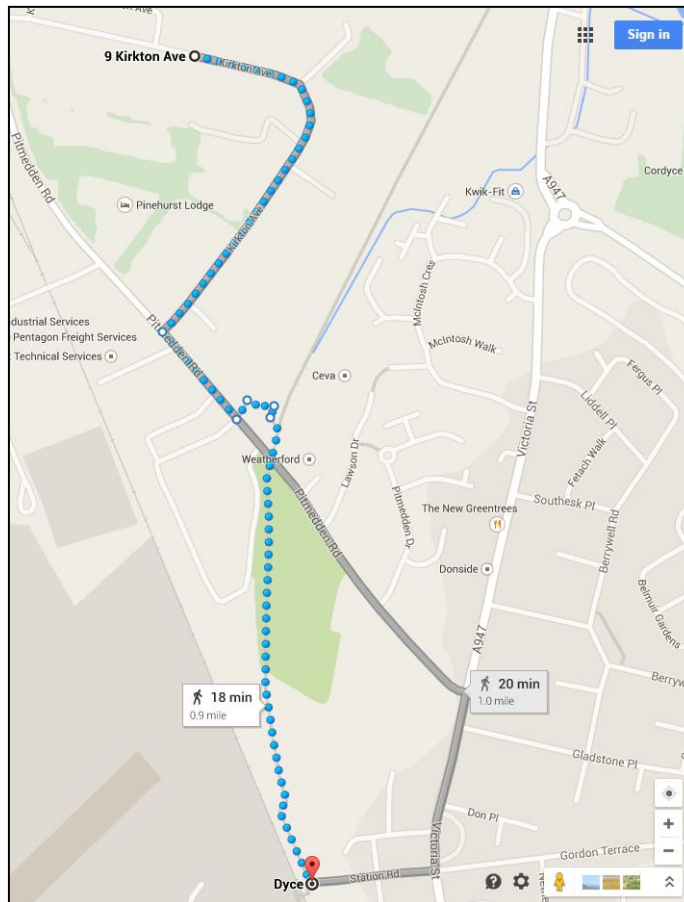

Availability: Please be advised there is a maximum of capacity of 16 people for this trip, so please book early to avoid disappointment.

Transport: Delegates are to make their own way to the event.

Address: Schlumberger Wireline, 9 Kirkton Avenue, Dyce AB21 0BF

Public Transport:

Regular trains are available from Aberdeen City Centre to Dyce Train Station. Please visit <http://www.thetrainline.com> for further details. The Schlumberger facility is approx. 15-20 minutes walk from Dyce train station.

Car

Parking: Visitor car parking is available at the Schlumberger site. The entrance to the car park is on Pitmedden road, just past the Pinehurst Lodge.

Site Visit Timeline:

- 09:45 Lectures to provide a background on the tools and services available at the Schlumberger facility
- 12:00 Buffet Lunch provided by Schlumberger
- 13:00 Wireline shop tour to see Schlumberger tools and demonstrations
- 15:30 Conclude site visit and make own arrangements home from the Schlumberger site facility.
